test id	description	note	OSDP	Features	d	CS	OSDP	Features	d	CS
050-01-01	Physical Interface	2-wire RS-485	Required							
050-01-02	TCP		Optional							
050-01-03	TLS		Optional							
		Support at least one of 9600 19200 38400								
050 02 01	Signalling 9,600	57600 115200 230400; 8 data bits, 1 stop	One of							
050-02-01	Signaling 9,000	bit, no parity bits.	required One of							
050-02-02	Signalling 19,200		required							
030-02-02	Signaling 19,200		One of							
050-02-03	Signalling 38,400		required							
000 02 00	Cigridining CO, 400		One of							
050-02-04	Signalling 115,200		required							
	3 3 3		One of							
050-02-05	Signalling 57,600		required							
			One of							
050-02-06	Signalling 230,400		required							
050-03-01	Character Encoding	supports all possible 8 bit values.	Required							
		interrogation/reply; reply within 200 ms;								
		only one reply per interrogation; respond								
		busy if unavailable; ack interrogation and								
050-04-01	Channel Access	respond later if necessary.	Required							
050-04-02		support retry	Required							
050-04-03	resend busy		Required							
050-04-04	new after busy		Required							
		lsb first unless otherwise noted; no								
050-05-01	Multi-byte Data Encoding	padding.	Required							
050.00.01	Packet Size Limits ACU to	accept at least 128 bytes total pdu size;	Demined							
050-06-01	Packet Size Limits PD to	accept max 1440 bytes total PDU size.	Required							
050-06-02	ACU		Required							
		respond in 200 ms max 3ms nominal; wait at least 2 character times before								
		transmitting; transmit 8 bits of marking bit								
050-07-01	Timing	(0xff) before a transmission	Required							
333 0. 01	9	max 20 ms inter-character delay during								
		message transmission; wait for marking								
		state then SOM to commence message								
050-08-01	Message Syn-chronization	reception	Required							
050-09-01	Packet Format	follow table 1 packet format.	Required							
050-09-02		process sequence 0	Required							
		SOM starts each OSDP command and								
050-09-03	SOM - Start of Message	response	Required							

050-09-04	ADDR - Address	Address field indicates PD address 0x00- 0x7e inclusive or special configuration address 0x7f	Required						
050-09-05		must not use 7f except for ID,PDID, CAP, PDCAP, COM, COMSET	Required						
050-09-06	LEN - Length	Length field (2 bytes LSB MSB) indicates length of OSDP command and response	Doguirod						
050-09-00	CTRL - Control	length of OSDF command and response	Required Required						
050-09-07	Security Block		Optional	Req'd					
050-09-08	CMND / REPLY		Required	Requ					
050-09-09	Valid command / reply	Command / Reply value in range	Required						
050-09-10	CHECKSUM	must support both	Required						
050-09-11	SOM Sent	(see old code)	Required						
050-09-12		(see old code)							
	Config address test		Required						
050-09-14	Rogue SCS Poll		Required						
050-09-15	CRC	NA di control de la control de	Required						
050-10-01	Large Data Arrays	Multi-part message fields added to certain commands and responses	Optional						
060-01-01	osdp_POLL		Required						
060-02-01	osdp_ID		Required						
060-03-01	osdp_CAP		Required						
060-04-01	osdp_LSTAT		Required						
060-05-01	osdp_ISTAT	required unless PDCAP reports 0 inputs	Required						
060-06-01	osdp_OSTAT	required unless PDCAP reports 0 outputs	Required						
060-07-01	osdp_RSTAT	required unless PDCAP reports 0 readers	Required						
060-08-01	osdp_OUT	required unless PDCAP reports 0 outputs	Required
